

ACA Notice of Patient Protections

Under the Affordable Care Act (ACA), the REI Full Benefit Plan and the REI Access Plan are required to provide the following notice and disclosure regarding primary care providers (PCP) and pediatricians as PCPs for a child. Also included is information about OB/GYN providers, prior authorization and referral information.

The health plan component options under the REI Full Benefit Plan and the REI Access Plan generally allow the designation of a PCP. Some plan options may require the designation of a PCP. You have the right to designate any PCP who participates in the applicable plan's network and who is available to accept you or your family members. For information on how to select a PCP, and for a list of the participating PCPs, please contact the appropriate health plan administrator or insurer as summarized below:

You do not need prior authorization from REI, the REI Full Benefit Plan, the REI Access Plan or any other person (including a PCP) in order to obtain obstetrical or gynecological care from a network health care professional who specializes in obstetrics or gynecology. The health care professional, however, may be required to follow certain Plan procedures, including obtaining prior authorization for certain services, following a pre-approved treatment plan, or complying with procedures for making referrals. For a list of network health care professionals who specialize in obstetrics or gynecology, please contact the applicable health plan administrator or insurer at the numbers or websites listed above.
